2. Structural indicators of positive mental health (Bilbao)

- 2.1. Introduction
- 2.2. Aims
- 2.3. Conceptual framework of the project
- 2.4. Work
 - 2.4.1. Starting point of view
 - 2.4.2. The quantitative exigency
- 2.5. Process
 - 2.5.1. Literature review.
 - 2.5.2. Pilot study
 - 2.5.3. Delphi method
- 2.6. Results
- 2.7. Concluding comments

3. Childhood determinants of adult mental illness (Leicester)

3.1. Introduction.

3.2. Background.

3.3. Summary of Aims.

3.4 Methods.

3.4.1 Analysis of original cohort data.

3.4.2 Contextualising prevention.

3.4.3 Literature Review.

3.5. Results.

3.5.1 Literature Review.

3.5.2 Parenting: analysis of data from UK National Birth Cohorts.

3.5.3 Contextualising Prevention.

3.6. Research Conclusions.

3.7. Implications for Indicators, and Recommendations.

4. Survey instruments and methods (Paris)

5. Monitoring service utilisation (Vienna)

5.1 Introduction

5.1.1. Background

5.1.2. The present situation

5.1.3. Aims of the project

5.2. Description of the process

5.2.1. Participating countries

5.2.2. Data sources

5.2.3. Strategy

5.2.4. Working method

5.2.5. Logistics

5.3. Results

5.3.1. Inpatient services

5.3.2. Day care services

5.3.3. Outpatient, mobile, telecommunication, complementary and other services

5.3.4. General population self-report surveys on mental health service use

5.4. Conclusions and recommendations

6. Quality indicators for mental health promotion and prevention (Nijmegen)

6.1. Introduction

6.2. Background

6.3. Aims

6.4. Methods

6.5. Results

6.6. Analysis and discussion

6.7. Conclusions and recommendations

7. Exploring and developing the relevant mental health information systems in the new Member States (Public Health Institute of the Republic of Slovenia, Ljubljana, Slovenia)

7.1. Introduction

7.2. Background

7.3. Research objectives

7.4. Methodology

7.5. Results

7.5.1. Availability of mental health indicators

7.5.2. Comparability of the data

7.5.3. Accessibility of the data

7.6. Conclusions and recommendations

8. Proposal for a harmonised set of mental health indicators

8.1. Aims and activities of MINDFUL

8.2. The set of indicators defined by MINDFUL

8.2.1. Indicators, domains and rationale

8.2.3. Description of the previously defined survey indicators

8.2.4. New indicators defined by MINDFUL to be added to the previously defined set

8.2.5. Description of promotion and prevention indicators as defined by MINDFUL

8.2.6. For future consideration

8.3. MINDFUL shortlist

8.4. Availability of the indicator data

9. Mental health in the EU health monitoring systems
